Educations

Weill Cornell Medicine, Cornell University

Master of Science in Biostatistics and Data Science

New York, NY

Sep 2017 - Dec 2018

Ewha Womans University

Bachelor of Science in Economics

Seoul, Korea

Mar 2013 - Dec 2016

University of California, Davis

Student Exchange Program

Davis, CA

Sep 2014 - Dec 2014

Research Experiences

Researcher

Johns Hopkins University

Baltimore, MD (remote)

May 2019 - Present

- Perform RNAseq analysis to find the effect of PM2.5 on six different brain areas
- Differential gene expression analysis, GO term analysis in R, GSEA

Temporary Researcher

JB Lab & Clinic

Seoul, Korea (remote)

Aug 2018 - Present

- Aim to determine the association of salt intake and hypertension, metabolic syndrome, and ARB treatment effect from a 10K+ hypertension patients data attained from a K-MetS study

Research Assistant

Department of Health Policy & Research, Weill Cornell Medicine

New York, NY

Aug 2018 - Jun 2019

- Determine the subpopulations with higher risk of stroke after myocardial infarction (MI) using causal inference methods
- Use Cox models to identify effect modification by demographics, stroke risk factors e.g. hypertension, diabetes, etc., and Charlson comorbidities
- Parallel-computing (SGE) to estimate conditional treatment effect from a 1.7+M sample of Medicare beneficiaries data

Research Assistant

Department of Health Policy & Research, Weill Cornell Medicine

New York, NY

March 2018 - Present

Project 2

- Abstract Submitted: Vista Blockade Immunotherapy in a Multi-modal Approach to Triple Negative Breast Cancer (TNBC) in Mice and Impact on Microbiome
- Microbiome research based on 3 mouse fecal samples DNA extraction and cutaneous human breast microbiome samples
- Aim to determine the effects of aVISTA, Cyclophosphamide and Radiation Treatment effects on human and mice microbiome to understand the treatment effects on breast cancer.
- Use DADA2 and perform diversity analysis, differential abundance analysis

Project 1

- Develop a comprehensive workflow for microbiome data analysis based on our analysis
- Analyze 16S rRNA gene sequence data from a study to understand the effect of fructose consumption on mouse gut microbiome
- Perform data preparation and generate phylogenetic trees from data and explore various methods for alpha/beta diversity, differential abundance analysis and classification/clustering

Leading Project Researcher¹

Department of Health Policy & Research, Weill Cornell Medicine

New York, NY
Sep 2017 - Aug 2018

- Advisor: **Dr. Davide Risso**
- Compared clustering methods for analyzing Single-Cell RNA Sequencing Data
- Performed data processing, simulation based on gamma-poisson distribution, normalization, dimensionality reduction (PCA) with R packages *scater*, *splatter*, *clusterExperiment*, etc.
- Compared among traditional and sequential K-means/PAM based on Adjusted Rand Index

Teaching Experiences

Teaching Assistant, Foundations Biomedical Applications (Master level)

Department of Healthcare Policy & Research, Weill Cornell Medicine

New York, NY
February 2018 - Present

- Lead labs sessions for 21 students with course-related realization with R
- Hold regular office hours regarding questions on course materials, assignments and academic concerns

Teaching Assistant, Categorical & Censored Data Analysis (Master level)

Department of Healthcare Policy & Research, Weill Cornell Medicine

New York, NY
Nov 2018 - Present

- Lead labs sessions for 25 students with course-related realization with SAS
- Hold regular office hours regarding questions on course materials, assignments and academic concerns

Professional Membership

- American Statistical Association (ASA)
- American Heart Association
- American Association for the Advancement of Science

Publications & Technical Reports

Publications - Submitted

- Josephine Kang, Karsten Pilonis, Camille Daviaud, Jeffrey Kraynak, Maria Rodriguez-Ruiz, Xi Kathy Zhou, Ji-Eun Park, Chenghuiyun Xu, Sandra Demaria, Silvia Formenti, Submitted, **Vista Blockade Immunotherapy in a Multi-Modal Approach to Triple Negative Breast Cancer (TNBC) in Mice and Impact on Microbiome**, *American Society for Radiation Oncology (ASTRO)*

¹ Presentation/Technical Report of this project won the "Best Capstone Project Award" in the Department of Healthcare Policy & Research, Weill Cornell Medicine

Publications - In Preparation

- Daeryong Kang, Changsoo Kim, Minyoung Kim, Jeongdong Lee, Ji-Eun Park, Jeong Bae Park, In preparation, **Sodium intake and its effects on hemodynamic and metabolic risk development**

Technical Reports

- Ji-Eun Park, Yitong Wang, Davide Risso, **Comparing Methods for Analyzing Single-Cell RNA Sequencing Data**, unpublished technical report, Department of Health Policy & Research, Weill Cornell Medicine, 2018 (https://github.com/jennprk/ClusteringMethods_Single-cell_RNASequencing)¹

Technical Skills

Programming	R, SAS, mySQL, Python, L ^A T _E X
Database Management	SQL Server, MS Access
Parallel-computing	Sun Grid Engine (SGE)

Honors & Awards

2018	Best Capstone Project Award , Weill Cornell Medicine, Graduate School of Medical Sciences	New York, NY
2016	Honors Scholarship , Ewha Womans University	Seoul, Korea
2015	Honors Scholarship(top 6%) , Ewha Womans University	Seoul, Korea
2014	Student Exchange Program Scholarship at University of California, Davis , Ewha Womans University	Seoul, Korea
2013	Honors Scholarship , Ewha Womans University	Seoul, Korea

Industry Experiences

Internship

Cheil Vascular Research Institute

Seoul, Korea
Jun 2015 - Sep 2015

- Conducted data cleaning of baseline characteristics and risk factors of patients data using Excel
- Performed descriptive analysis of the baseline characteristics of hypertension patients with STATA

Voluntary & Community Activities

Webinar Presenter

Department of Health Policy & Research, Weill Cornell Medicine

New York
November 2018

- Collaborate with 2 staff and 1 faculty member to develop a program introduction webinar as a current student representative speaker

Program Marketing Translator

Department of Health Policy & Research, Weill Cornell Medicine

New York, NY

Jan 2018 - Feb 2018

- Translated the school program marketing materials written in English to Korean

Student Council Member

College of Social Sciences, Ewha Womans University

Seoul, Korea

Mar 2013 - Feb 2014

- Collaborate with 16 staff members to organize campus activities and events

Voluntary Assistant

Cheil General Hospital & Women's Healthcare Center lab

Seoul, Korea

Dec 2011 - Feb 2012

- Managed and transformed physician notes of patients in pregnancy into an electronic data using Excel
